PROJECTS

Netflix frontpage

Jan 2025

Built a Netflix clone using only HTML and CSS! I challenged myself to recreate Netflix's clean interface without JavaScript or advanced tools—just basic web technologies. The project features a responsive layout that works seamlessly across devices. It was a fun experiment to test my skills and explore creative design solutions.

Petstore

Apr 2024 - Aug 2024

I built a dynamic pet store website in just 10 days using HTML, CSS, JavaScript, SCSS, and Django. The journey included planning features like user authentication and shopping carts, designing a responsive frontend, and integrating the Django backend for seamless functionality. After rigorous testing, debugging, and deployment, the site is now live and ready for users. This project enhanced my skills in full-stack web development.

playverse

Aug 2024 - Oct 2024

I embarked on this journey with a clear goal in mind: to create a one-stop destination for gamers seeking top-notch accessories and PS5 game cases. From cutting-edge peripherals to sleek console enhancements, every product on the platform is handpicked to elevate your gaming experience to new heights.
